

SPECIFIC REGULATIONS FOR EQUESTRIAN SPORTS

INTRODUCTION

These regulations contain the basic rules for the organization of the *World Equestrian Sports Championship* of the International Military Sports Council (CISM).

The organization of the *World Equestrian Sports Championship* is complex. The Organizing Committee of the host country must possess an adequate and solid technical background and must have the capability to foresee and solve all possible problems a championship of this magnitude could bring along. The four International Equestrian Federation (F.E.I.) disciplines: *Jumping, Eventing, Dressage* and *Endurance* are part of the championship.

TECHNICAL RULINGS

The events will be ruled according to the International Equestrian Federation (F.E.I.) rules and regulations (last edition)

EQUESTRIAN SPORTS AND THE CISM

Through an adequate evaluation, similar to the one which determined the election of several sports practised at the military scope, suggested by the CISM, it was determined the incorporation of the equestrian sports in its calendar, stimulating the member countries for their active participation.

The equestrian sports have had a remarkable evolution in the most developed countries. The riders which participate in the most important international competitions are in most of the cases civilians, amateurs or professionals. The military riders, owing to organic transformations or for organic reasons have been replaced by those in the great competitions.

The equestrian competitions reserved for military riders exclusively, follow the objectives of offering an adequate opportunity to all those riders that try hard to acquire and keep a good technical level, can get performances that enable them for the competitions of the best level.

Up to the present CISM has organized the following championships:

I	1969	Vienna (AUT)	Dressage – Jumping – Eventing
